

Laurent Foyer

Profile Summary

Graduate Computer Science Engineer specializing in data analysis and statistical modeling. Experienced in the full technical stack: from software programming and data visualization to electronic systems and hardware.

🔍 France and Europe

Contact details

Skills

- **Languages**
 - English (Native)
 - French (Native)
 - Spanish (Advanced)
- **Programming**
Python, C, C++, Java, JavaScript, SQL, Bash
- **Algorithms and DB**
Algorithms, OOP, databases, web
- **ML and Data Analysis**
Machine learning, statistics, optimization, image and signal processing
- **Libraries**
pandas, NumPy, PyTorch, scikit-learn, OpenCV, SciPy
- **Software and Tools**
Linux, Git, LaTeX, Azure Databricks, Spotfire
- **Electronics and Embedded**
Electronics, sensors, Arduino, Raspberry Pi, NVIDIA Jetson, IoT
- **Instrumentation**
Oscilloscope, multimeter, function generator, power supply

Education

MSc in Computer Science and Information Technology

INSA Rouen, 2022–2025

Associate Degree in Electrical Engineering

IUT de Rouen, 2020–2022

Academic Exchange – Computer Science

ITBA (Buenos Aires), Feb–Jul 2024

Experience

Data Analyst Intern | ASML (Veldhoven, NL) Jun 2025–Jan 2026

- Overhauled a defect analysis dashboard for reticle monitoring in semiconductor production (lithography).
- Optimized data architecture and queries (SQL & Python) on Spotfire and Databricks, reducing load times.
- Designed new KPIs and interactive features to streamline decision-making, using web components (HTML/CSS/JS).
- Collaborated with engineers to validate data and ensure the reliability of mission-critical dashboards.
- Documented technical workflows and procedures to facilitate knowledge sharing within the team.

Machine Learning Research Intern at AIT (Vienna, AT) Apr–Jun 2025

- Implemented federated learning research pipelines for object detection using Ultralytics YOLO and Python.
- Deployed on NVIDIA Jetson, conducting performance benchmarks and inference optimization.
- Evaluated model performance across various training scenarios and convergence benchmarks.

Data Analyst Intern at INFN-LNF (Frascati, IT) Jul–Aug 2023

- Performed energy response analysis for the calibration of silicon drift detectors (SDD) in nuclear physics (SIDDHARTA-2, DAΦNE).
- Used C++ and CERN's ROOT framework for statistical analysis of large experimental datasets.

Electronics Intern at ÖAW-SMI (Vienna, AT) Apr–Jun 2022

- Assisted in the assembly and hardware testing of silicon photomultiplier pre-amplifier boards for high-precision particle physics (ASACUSA, CERN-AD).
- Debugged Arduino and PyQt code; installed pre-amplifier boards with FPGA modules.

Projects

Time Series Forecasting for Enedis Sep–Dec 2024

- Built ML pipelines and time series models to forecast electricity consumption in a Scrum team of 9 (25h/week).

1:10 Scale Autonomous Vehicle Sep 2024–Jan 2025

- Designed and assembled a 1:10 autonomous car based on NVIDIA Jetson, inspired by MuSHR / F1Tenth.

Hobbies & Interests

Photography, dance (salsa, bachata, modern jazz), board games, drawing.
